Conclusions

- 1) Fed higher for longer is putting upward pressure on the dollar
- 2) BoJ lower for longer is putting downward pressure on the yen
- 3) BoJ raising interest rates is difficult with very high government debt levels in Japan

The yen has depreciated more than 50% over the past three years

Yen: Real effective exchange rate at lowest levels in decades: Supports Japanese exports

Source: BIS, Bloomberg, Apollo Chief Economist

BoJ: Lower for longer

Japan: No rate hike since 2007

Source: Bloomberg, Apollo Chief Economist

Japanese 10-year yield

Weaker yen has had no material impact on inflation and Japanese core inflation has started to move lower

Source: Bloomberg, Apollo Chief Economist

Japan: Core inflation coming down

Wage inflation remains in the normal range

Source: Bloomberg, Apollo Chief Economist (The BOJ has positioned wage growth of at least 3% as a prerequisite for stable achievement of its 2% inflation target.)

BoJ: Foreign exchange intervention, monthly data, last observation is April 2024

Source: Ministry of Finance, Bloomberg, Apollo Chief Economist

Fed: Rates higher for longer

US inflation is sticky above the Fed's 2% inflation target

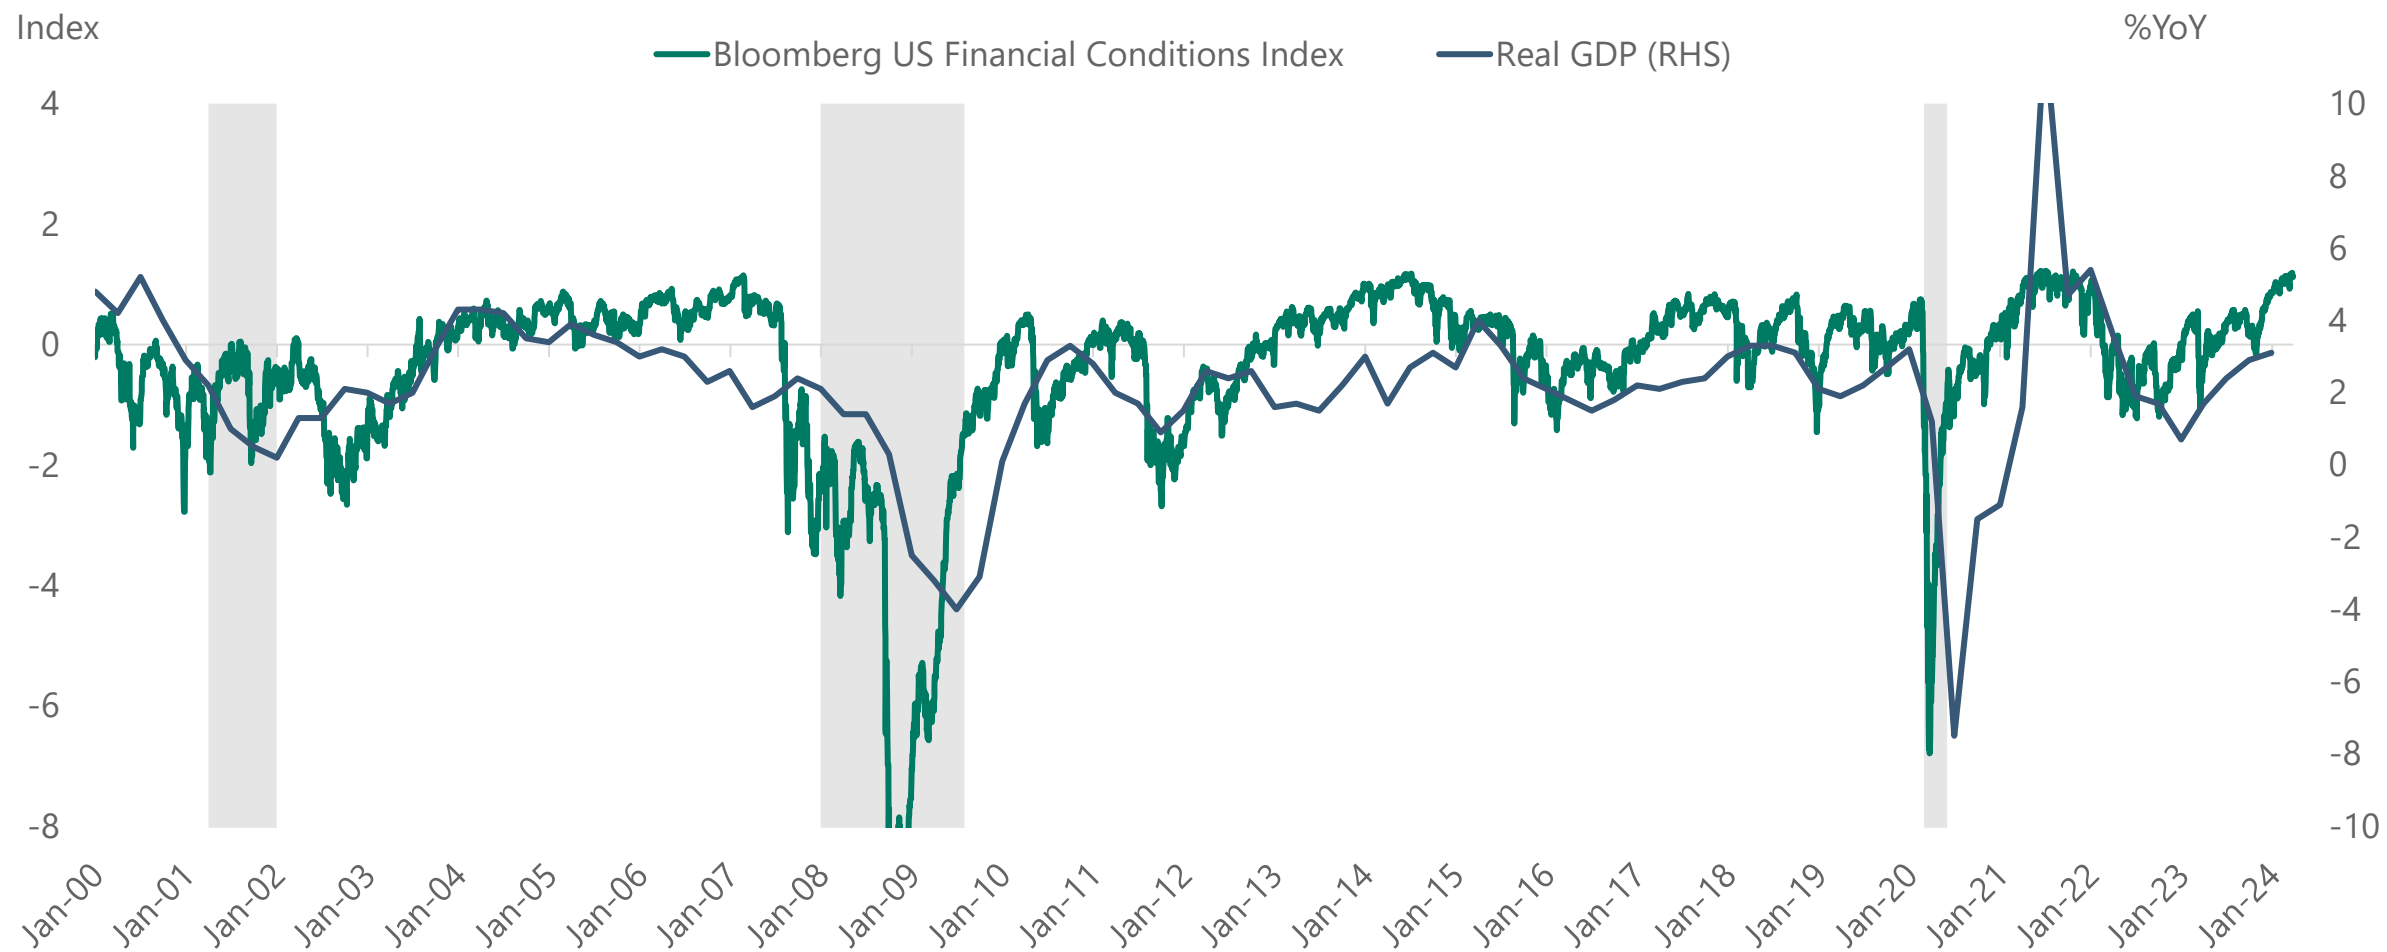

Core PCE inflation will remain high for the rest of 2024

Reaccelerating economy could create another spike in inflation

Easier financial conditions point to a rebound in GDP growth

US/Japan interest rate differentials
are the key driver of USDJPY

USDJPY and US/JP 10s highly correlated

Japanese long-term term interest rates remain very low

Negative returns from holding JPY-hedged Treasury yields

Dollar-hedging costs for Japanese investors

Source: Bloomberg, Apollo Chief Economist

Japan owns more than \$1trn in US Treasuries, more than China

Source: Bloomberg, Apollo Chief Economist

Japanese investors have been net buyers of US Treasuries recently

Source: Ministry of Finance Japan, Bloomberg, Apollo Chief Economist

Japanese investors buying foreign bonds

Source: Ministry of Finance Japan, Bloomberg, Apollo Chief Economist

Japan: Net flows into foreign bonds: When US rates rise, Japanese investors sell US fixed income

Foreign net purchases of Japanese bonds

Source: Ministry of Finance Japan, Bloomberg, Apollo Chief Economist

Japan: Worries about fiscal sustainability

Japan government debt to GDP at 250%

Japan: General Government Gross Debt as % of GDP

IMF forecasts

If Japanese interest rates go up it will create problems because of high debt to GDP

Markets pricing Fed funds to bottom at 4%

The BoJ owns almost 60% of Japanese government bonds outstanding

G4 central bank balance sheets

NIM for banks: US, Japan, and China
